"The Hormone Lab"

Experts in endocrinology and immunoassay

Biochemistry Profiles

Senior Feline Profile

Total T4, ALT, ALP, Total Protein, Albumin, Globulin, A:G Ratio, Urea, Creatinine, Glucose, Calcium, Phosphorus, Sodium, Potassium, Na:K Ratio, Fructosamine, Bilirubin.

Senior Canine Profile

Total T4, ALT, ALP, Total Protein, Albumin, Globulin, A:G Ratio, Urea, Creatinine, Glucose, Calcium, Phosphorus, Cholesterol.

Feline Hyperthyroid Profile - Silver

Total T4, ALT, ALP, Total Protein, Urea, Creatinine, Phosphorus.

Feline Hyperthyroid Profile - Gold

Total T4, Free T4 ED, ALT, ALP, Total Protein, Urea, Creatinine, Phosphorus.

Canine Addisonian Profile

ACTH Stimulation Test, Aldosterone Pre and Post, Sodium, Potassium, Na:K Ratio.

Feline Addisonian Profile

Feline ACTH Stimulation Test, Aldosterone on basal sample, Sodium, Potassium, Na:K Ratio.

Small Animal Biochemistry Profile

ALT, ALP, Total Protein, Albumin, Globulin, A:G Ratio, Urea, Creatinine, Glucose, Calcium, Phosphorus, Cholesterol, Bilirubin.

Small Animal Kidney Profile

Total Protein, Albumin, Globulin, A:G Ratio, Urea, Creatinine, Glucose, Calcium, Phosphorus, Sodium, Potassium, Na:K Ratio.

Pre OP Profile

ALT, Urea, Creatinine, Bile Acids.

Laminitis Profile Plus

ACTH, Insulin, Cortisol, Glucose, Urea, Creatinine, Calcium, Phosphorus, Sodium, Potassium, Total Protein, Albumin.

For all these profiles the Total T4, Free T4 by equilibrium dialysis, Cortisol, Aldosterone and ACTH assays will be run using RIA (radioimmunoassay) methods. We believe this to be the best method to accurately measure hormones.
